## DETAILED ACTION

### *Election/Restriction*

- I. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

- Group I. Claims 1-5, 7, 10 and 11, drawn to polynucleotide, chimeric gene, transformed host cell, and the first method of using the polynucleotide: a method of altering the level of expression of an APS kinase in a host cell.
- Group II. Claim 6, drawn to an chorismate synthase polypeptide.
- Group III. Claim 8, drawn to a second method of using the polynucleotide: a method of obtaining a nucleic acid fragment encoding a portion of an APS kinase polypeptide.
- Group IV. Claim 9, drawn to a third method of using the polynucleotide: another method of obtaining a nucleic acid fragment encoding a portion of an APS kinase polypeptide.

For each of inventions I-IV above, restriction to one of the following is also required. Therefore, election is required of one of inventions I-IV and one of inventions (a)-(f).

Art Unit: 1638

- (a). SEQ ID No: 1 or a sequence encoding SEQ ID No: 2.
  - (b). SEQ ID No: 3 or a sequence encoding SEQ ID No: 4.
  - (c). SEQ ID No: 5 or a sequence encoding SEQ ID No: 6.
  - (d). SEQ ID No: 7 or a sequence encoding SEQ ID No: 8.
  - (e). SEQ ID No: 9 or a sequence encoding SEQ ID No: 10.
  - (f). SEQ ID No: 11 or a sequence encoding SEQ ID No: 12.
2. The inventions listed as Groups I-IV and (a)-(f) do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: (a)-(f) represent structurally different polypeptides and the polynucleotides encoding them. Therefore, where structural identity is required, such as for hybridization or expression, the different sequences have different effects. The polynucleotide of Group I and the polypeptide of Group II are biologically, structurally and chemically distinct from each other. Further, the polynucleotide can be used in different methods, such as the method of claim 7 and the methods of Groups III-IV. The methods use different reagents, have different steps, and/or have different results.
3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently

Art Unit: 1638

named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(l).
